

BIMETAL THERMOMETER WITH CONTACT

Model: 2345

Designation:

APPLICATIONS:

2345 series thermometer is designed for corrosive media in chemical, petrochemical and process engineering industries. When the temperature gets to the set value, the contacts opens/closes the circuits. It has a magnetic electric contact.

Specifications:

- Dial size: 4"
- Connection: 1/2" BSP, 1/2"NPT, 1/2"BSPT, M20 x 1.5"
- Protection class: IP54
- Temperature range: -40+60 deg C, to 0-600 deg C

Material specification:

- Case: 304 stainless steel case and DIN bayonet ring
- Window: Glass
- Wetted parts: stainless steel

Electric contact: Magnetic snap on type, contact type according to request, single contact or double contact
 Maximum working voltage: AC380V or DC220V
 Maximum current: 1A
 Contact power: 30VA
